

88% of Germans are against GM Foods

81%

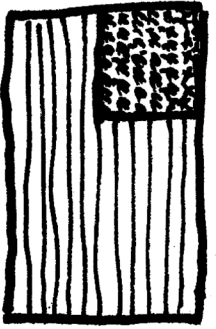

In Europe, GM Foods have the heaviest criticism.

However, in other regions of the world, GM seeds can provide means for invaluable sustenance

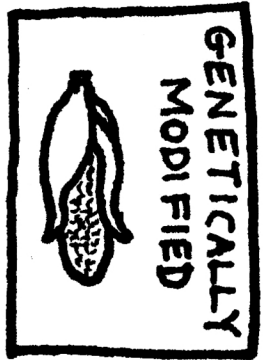

"Agricultural biotechnology holds great promise for Africa..." - Hassan Adamu, Nigeria's minister of agricultural and rural development

But do we need it?

BY SCOTT MIHALIK 2008

THE Supreme Court 1980

votes a 5-4 ruling allowing the first U.S. patent of a living thing:

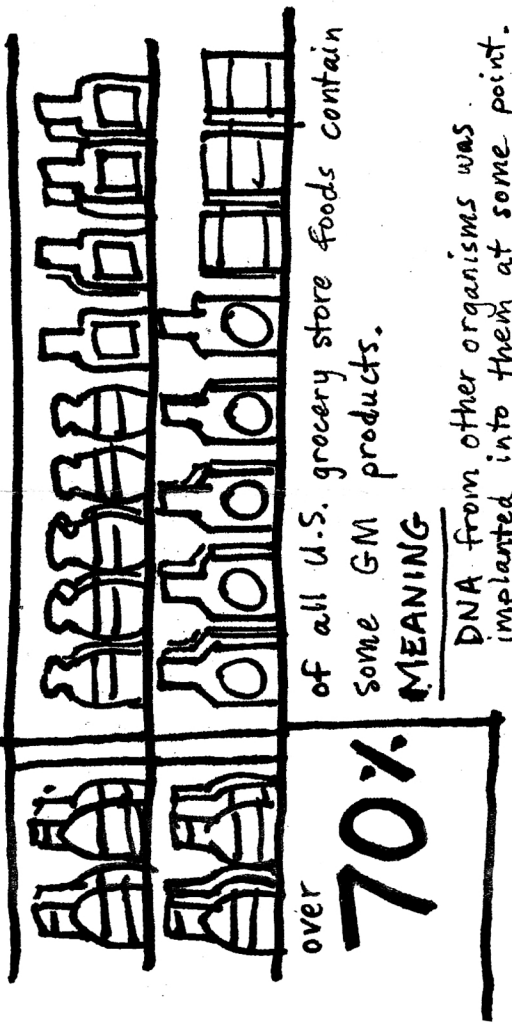

a GM bacterium used to break down crude oil.

Diamond v. Chakrabarty

Genetic modification is widespread in the foods we eat everyday.

TODAY

of all U.S. grocery store foods contain some GM products.

MEANING

DNA from other organisms was implanted into them at some point.
